Learn how to:

- Design a monitoring plan
- Execute water quality monitoring basics: physical, chemical and biological parameters
- Manage data and assure quality
- Start and maintain a sustainable monitoring program

Fostering stewardship of water resources.

Audience

- Individuals or groups that would like an introduction to water quality monitoring or have had previous training and need a refresher.
- Resource professionals seeking subsequent Level 2 or Level 3 training.
- Community groups, educators, school groups or resource professionals.

Existing Group Benefits

- Replacement supplies and equipment (as funds allow)
- Improved quality of data collection
- Community contacts and networking
- Service-learning training: translating data into action
- 2010 and/or 2011 Water Summit for Students and Teachers invitation with subsidized costs
- Educator stipend for mentoring new groups
- Bus costs for two local water monitoring events for each year (as funds allow)

New Group Benefits

- Support for purchase of appropriate water monitoring equipment
- Bus costs for two local water monitoring events for each year (as funds allow)
- 2010 and/or 2011 Water Summit for Students and Teachers invitation
- Community contacts and networking
- Technical assistance
- Support from the regional mentor

Registration

Please call Kathryn S. Watson, Education and Outreach Coordinator, to register. Due to a generous grant from the Environmental Protection Agency, there is no cost associated with registration.
